

WAMEDWeb

WAMEDWEB or Web Portal

The [WAMedWeb](#) provides the tools and resources to help healthcare providers conduct business electronically with Washington State Medicaid. The web portal is an Internet based application. No software is downloaded. Claims may be processed through numerous screens. Single and batch claims can be used with the web portal. The web portal allows the provider **real time information on client eligibility**. The web portal can be for small or large providers. It supports HIPAA compliant 837 transactions. Additional transactions will be added in new releases. You must go through a web [enrollment](#) process to use this software. If you have already enrolled and **did NOT** indicate you wanted the **270/271 Eligibility and Response transaction** you must call to **update your registration at 1-800-833-2051**. These services are free.

Clearing House

Billing Agent

Vendor Software

Are often fee for service. These services may be practical for large clinics and/ or complicated file types. Please check with your service to see if they are HIPAA compliant.
